Subject Index

A

Acetoin, formation by *Bacillus polymyxa* of, 481
Activated sludge, improvement of settling characteristics of, 571
Advanced wastewater treatment, using a submerged bio-film process, 355
Algae, hydrogen production by, 553
Alkaline xylanase, production from *Escherichia coli*, 373
Alkaloid, production by *Claviceps* sp., 339
Alkaloid production, effect of surfactants on, by *Claviceps*, 499
Aminopropyl porous glass, immobilization of polynucleotide phosphorylase on, 455
Ammonia, and glucose control in *Escherichia coli* fermentations, 233
Ammonium ion, control of, concentration of in fed-batch culture of microorganism, 63
———, detection of, in microbial cultivation, 63
Ammonium ion selective electrode, characterization of, 63
Amylopectin, as a substrate of anaerobic digestion, 81
Amylose, as a substrate of anaerobic digestion, 81
Anaerobic digestion, of raw starch by *Bacillus* sp., 81
Anaerobic degradation, of 2-methoxyethanol, 305
Anaerobic fermentation, effect of inhibitor from evaporator condensate on, 523
Anaerobic filter, effects of wastewater strength, 545
Anaerobic treatment, using a plate-column reactor, 259
Aromatic monomers, in steam-exploded poplar, 567
Arylesterase, from baker's yeast, 459
Asparagine, for alkaloid production in *Claviceps* sp., 339
Aspergillus niger, protoplast fusion of, 473
———, fermentation of citric acid from tamarind seed by, 561
Aspergillus sp., glucoamylase production by, 405
Aspergillus terreus, cellulolytic enzymes from, 463
Automatic control, of carbon source supply and dissolved oxygen concentration, 317
Automatic fed-batch culture, with volatile carbon source supply, 317
Awamori, matured in *kame* and non-porous containers, 11
———, sulfur compounds in, 129

B

Bacillus brevis, degradating isonicotinic acid, 109
Bacillus polymyxa, 2,3-butanediol stereoisomers produced by, 481
Bacillus sp., for anaerobic raw-starch-digestion, 81
Bacterial pretreatment, of pectic wastewater, 265
Baker's yeast, an esterase from, 459
Batch-cultured activated sludge, growth characteristics of, 433
Bio-film process, advanced wastewater treatment using, 355
Biogas, from organic waste, 45
Bio-Gel P-2, chromatography of wine phenolics on, 487
Brassylic acid, production by *Torulopsis candida*, 97
Brevibacterium divaricatum, invertase from, 285
(*R*)-3-Bromolactic acid, production from (±)-3-bromo-1,2-propanediol, 251
2,3-Butanediol dehydrogenase, stereospecificity of, from *Bacillus polymyxa*, 481
Bulking agent, effect of, on the sewage sludge composting, 539
meso-2,3-Butanediol, formation by *Bacillus polymyxa* of, 481

C

Calcium, requirement for bacterial flocculation, 57
Candida sp., of ethanol-using, 379
Candida utilis, mutualistic dialysis culture with *Streptococcus lactis*, 311

Carbon dioxide, concentration of exhaust gas as control index for fed-batch culture, 317
Cassava starch, digestion of, by glucoamylase, 405
Catalytic basket reactor, with immobilized yeasts, 25
Cell protein, measurement of, 411
Cellulase, produced by *Penicillium purpurogenum*, 211
———, produced by soy lees, 77
Cellulolytic enzymes, from *Aspergillus terreus*, 463
Cellulose 1,4-β-cellobiosidase, from *Penicillium* sp., 77
Cellulose saccharification, synergistic action between two cellobiohydrolases in, 211
Ceramic bioreactor, in the form of honeycomb-monolith, 327
Chattonella antiqua, effect of vitamin B_2-acid on the growth of, 169
Chitosan, immobilization on, 255
(*R*)-3-Chlorolactic acid, production from (±)-3-chloro-1,2-propanediol, 251
Chondroitin sulfate, depolymerization of, 155
Chondroitinase ABC, induction of, 155
Citric acid, production from tamarind seed powder, 561
———, production of, by *Aspergillus niger*, 473
Claviceps sp., alkaloid production by, 339, 499
Cloning, of lipase genes, 363
Clostridium thermocellum, ethanol production by 447
Compost, degree of maturation, 351
Continuous production, of homopolynucleotides by immobilized polynucleotide phosphorylase, 517
Copper, respiratory inhibition of *Tetrahymena pyriformis* by, 119
Corn hulls, preparation of *koji* from, 175
Corynebacterium sp., guanidinoacetate amidinohydrolase from, 29
Culture, with a pressure controlled fermentor, 383
Cyanobacteria, screening for, 553

D

Deflocculation, of bacterial cell flocs by EDTA and by Actinase E, 57
———, of sewage activated sludge by Actinase E, 57
Denitrification, by immobilized cells of *Paracoccus denitrificans*, 533
Derepressed mutant, for hyperproducer of enzyme, 239
Diacetyl reductase, S(+)-acetoin formation by, 481
Dihydrouracil of enzymatic conversion into uracil, 199
Dihydrouracil oxidase, from *Rhodotorula glutinis*, 205
Dimethyl sulfide, in *awamori*, 129
Dipicolinic acid, fermentative production by *Penicillium citreoviride* from sugarcane molasses, 493
Dispersion model, with finite mass transfer coefficient, 327
Dissolved oxygen, for growth of *Rhizobium trifolii*, 335

E

EDTA, deflocculation of bacterial all flocs by, 57
Electron accelerator, disinfection of sludge by, 299
Endo-β-*N*-acetylglucosaminidase, from *Flavobacterium*, 397
Energetic analysis, lipid accumulation by *Rhodotorula glutinis*, 557
Enzymatic oxidation, of dihydrouracil to uracil, 199
Enzymes, in corn hull *koji*, 175
Erwinia carotovora, pectic wastewater treatment by, 265
Escherichia coli, fermentations under the control of glucose and ammonia, 233
Ester, of *awamori* during aging, 17
Ethanol, as carbon source for yeasts, 379
———, effects on the metabolism of *Schwanniomyces castelii*, 279
———, production from fodder beets, 179
———, production from sago starch, 293
———, production of by basket reactor, 25
Ethanol fermentation, by *Saccharomyces cerevisiae*, 567
Ethanol production, from cellulose by *Clostridium thermocellum*, 447
———, from Jerusalem artichoke, 239

Evaporator condensates, methane fermentation of, 523
Extracellular xylanase, production from *Escherichia coli*, 373

F

Fed-batch cultivation, of *Escherichia coli*, 63
———, of *Saccharomyces cerevisiae*, 63
Fed-batch culture, of recombinant bacterium, 503
Fixed-bed bioreactor, in methane fermentation, 523
Flavobacterium, endo-β-*N*-acetylglucosaminidase, 397
Floc-forming bacteria, from sewage activated sludge, 57
Floc-forming bacterium, addition of, to activated sludge, 571
Fluorometric measurement, of microbial cell, 411
Fodder beets, *Beta vulgaris*, ethanol production from, 179
Free fatty acids, of *awamori* during aging, 11
β-D-Fructofranoside fructohydrolase, purification and properties of, from *Brevibacterium divaricatum*, 285

G

Gas production rate, in wastewater treatment by, an anaerobic filter, 545
Gas-stirred reactor, K_La in, 433
Gene expression, from tryptophan promoter, 503
Geotrichum loubieri, (*R*)-3-halolactic acid production by, 251
1,4-β-D-Glucan cellobiohydrolase, purification and properties of, from *Penicillium purpurogenum*, 211
Glucoamylase, raw cassava starch digestion by, 405
Glucose, and ammonia control in *Escherichia coli* control, 233
β-Glucosidase, immobilization of, 255
(*R*)-3-Halolactic acid, production by *Geotrichum loubieri*, 251
Glycin, production of L-serine from, 389
Glycoproteins, as the substrate of endo-β-*N*-acetyl glucosaminidase, 397
Glyoxalase I and II, in glycolytic bypath, 1
Grapes, phenolics in, 487
Growth of human cell, kinetic expression of, 347
Guanidinoacetate amidinohydrolase, from *Corynebacterium* sp., 29

H

Higher alcohols, of *awamori* during aging, 17
Homopolynucleotides, production of, by immobilized polynucleotide phosphorylase, 517
Honeycomb-monolith bioreactor, immobilized cells on, 327
Human monocytic leukemia cell line, growth characterizations of, 145
Humicola lanuginosa, lipase production from, 451
Humicola sp., conversion of rifamycin B to rifamycin S by, 343
Hyaluronate lyase, production by repeated batch culture, 419
Hydrogen production, by photosynthetic bacteria, 245
Hydrogen sulfide, biological removal of, 161
Hydrogenase, evolution of hydrogen mediated by, 553

I

Immobilization, of β-glucosidase, 255
———, of *Paracoccus denitrificans*, 533
———, of *Rhodotorula glutinis* cells, 199
Immobilized cells, hydrogen production by, 245
Immobilized polynucleotide phosphorylase, production of homopolynucleotides, 517
Inhibition by aromatic monomers, of ethanol fermentation, 567
Interferon-β induction, by polynucleotides produced by immobilized polynucleotide phosphorylase, 517
Inulinase, of *Kluyveromyces fragilis*, 239
Invertase, purification and properties of, from a glutamate-producing bacterium, 285
Isonicotinic acid, degradation by *Bacillus brevis*, 109
Issatchenkia sp., of ethanol-using, 379

J

Jerusalem artichoke, for ethanol production, 239

K

Kinetic analysis, lipid accumulation by *Rhodotorula glutinis*, 557
———, of honeycomb-monolith bioreactor, 327
Kinetic expression, of human cell growth, 347
Kinetics, of H_2S removal, 161
Kluyveromyces fragilis, inulinase of, 239
Koji, from corn hulls, 175

L

S-Lactoylglutathione, growth-promoting effect of, 1
Lipase, from *Alcaligenes denitrificans*, 363
———, from *Humicola lanuginosa*, 451
———, hyperproduction using recombinants DNA, 363
Lipid accumulation, kinetic and energetic analyses of, by *Rhodotorula glutinis*, 557

M

Maceration, of carrot and celery by pectinase, 37
Mammarian cell, growth of, 347
Mashing process, an *saké* brewing, 187
Mass balance, during growth of mammalian cell, 145
Material balance, in ethanol fermentation, 447
Mesophilic digesting sludge, which degrates 2-methoxyethanol, 305
Methane, fermentation from 2-methoxyethanol, 305
———, poly-β-hydroxybutyrate production from, 271
Methane, production using a bio-reactor packed with pumice stone, 523
Methane fermentation, using a plate-column reactor, 259
Methanobacterium thermoautotrophicum, methane production from hydrogen and carbon dioxide by, 383
Methanogenic consortium, which degrades 2-methoxyethanol, 305
Methanol, production of L-serine from, 389
2-Methoxyethanol, methane fermentation on, 305
Methylglyoxal, growth-inhibitory effect of, 1
Methylglyoxal reductase, inducible formation of, 1
Methylocystis parvus, poly-β-hydroxybutyrate production by 271
Methylotroph, production of L-serin by, 389
Microbial cell mass, estimation of, 411
Microbial oxidation, of (±)-3-halo-1,2-propanediol, 251
Molecular hydrogen, evolution by cyanobacteria of, 553
Mucilage polysaccharides, extracted from sewage activated sludge, 51
Mucor sp., non-polar lipids from *n*-alkanes, 5
Mutation, of *Torulopsis candida* for production of brassylic acid, 97
Mutualistic dialysis culture of *Streptococcus lactis* and *Candida utilis*, 311

N

N^6-(2-carboxyethyl)-NAD, synthesis of, by alkylation of NAD, 511
NH_3, removal of by a deodorizing filter, 425
Nitrifier, NH_3 removal by peat with, 425
Nitrilotriacetate, degradation by bacteria, 103
Noncooking alcoholic fermentation, by using corn hull *koji*, 175
Non-polar lipids, in *n*-alkanes-grown *Mucor* sp., 5
Non-tannin phenolics, fractionation of, from wines, 487

O

Organic space loading rate, effects of, on wastewater treatment, 545
Overall volumetric oxygen transfer coefficient, in a gas-stirred reactor, 441
Overproduction, of β-galactosidase, 503
Oxygen diffusivity, in sewage sludge cake, 539

P

Pachysolen tannophilus, D-xylulose reductase from, 219
Paracoccus denitrificans, denitrifying activity

of, 533
Paracoccus denitrificans, immobilization with polyelectrolyte complex, 533
Peat, as deodoring material, 161
Peat biofilter, removal of NH_3 by, 425
Pectate lyase, from *Erwinia carotovora*, 265
Pectic wastewater, treatment of, 265
Pectinase, maceration of carrot and celery by, 37
Penicillium citreoviride, a mutant producing dipicolinic acid from sugarcane molasses, 493
Penicillium sp., cellulose 1,4-β-cellobiosidase from, 77
Penicillium purpurogenum, two 1,4-β-D-glucan celobiohydrolases from, 211
Perforated plates in gas-stirred reactor, 441
Phenolics, extraction of, from wines, 487
Phosphate elimination, by batch-cultured activated sludge, 433
Photopigments, vitamin B_{12}, in *Rhodopseudomonas*, 137
Photosynthetic bacteria, for hydrogen production, 245
———, SCP production by, 137
Pineapple waste, SCP production from, 137
Plasmid, improved stability of, by subcloning, 363
Plate-column reactor, anaerobic treatment using, 259
Polyelectrolyte complex, immobilization of *Paracoccus denitrificans* with, 533
Poly-β-hydroxybutyrate, production from methane, 271
Polyinosinic acid·polycytidylic acid preparation, produced with immobilized polynucleotide phosphorylase, 517
Polynucleotide phosphorylase, immobilization of, 455
Polysaccharide, production from *Rhizobium trifolii*, 335
Proanthocyanidins, in *Fragaria vesca*, 227
3-Propiolactone, as an alkylation agent for NAD and NADP, 511
Proteus vulgaris, chondroitinase ABC production by, 155
Protoplast fusion, of *Aspergillus niger*, 473

R

Radiation-disinfection, of sewage sludge, 299
Raw starch digestion, by *Bacillus* sp., 81
Reaction conditions, in reaction of NAD with 3-propiolactone, 511
Reaction rate, of thermophilic sewage sludge composting, 539
Repeated batch culture, hyaluronate lyase production by, 419
Respiratory inhibition, of *Tetrahymena pyriformis* by copper, 119
Rhizobium trifolii, growth and polysaccharide, 335
Rhodobacter, for hydrogen production, 245
Rhodopseudomonas, for hydrogen production, 245
Rhodopseudomonas sphaeroides, SCP production by, 137
Rhodotorula glutinis, dihydrouracil oxidase from, 205
———, kinetic and energetic analysis of lipid accumulation by, 557
Rice straw, biogas production from, 45
———, composting of, 351
Rifamycin S, production from rifamycin B by immobilized oxydase, 343
Rotating packed disk reactor, immobilized rifamycin B oxydase in, 343
RP::Mu, *in vivo* cloning vehicle for lipase gene, 363

S

Saccharomyces cerevisiae, growth arrest of, 1
Saccharomyces rouxii, depolymerization of tannins by, 227
Saké, brewing by optimal control system, 187
Sago starch, ethanol production from, 293
Sawdust, biogas production from 45
Schwanniomyces alluvius, for single cell production from starch, 71
Schwanniomyces castellii, effects of ethanol to, 279
SCP production, of *Rhodopseudomonas sphaeroides* P47 from pineapple waste, 137
Scytalidium lignicola β-glucosidase from 255
Serine, production of from methanol and glycine, 389
Serum-free medium, growth of human monocytic leukemia cell line in, 145

Settling characteristics, of activated sludge, 571
Sewage activated sludge, nitrilotriacetate-degrading bacteria from, 103
———, sugar composition of mucilage polysaccharide from, 51
Sewage sludge, radiation-disinfection of, 299
Sewage sludge composting, effect bulking agent on, 539
Simulation model, of the *saké* mashing process, 187
Single cell protein, from potato starch, 71
Solid phase fermentation, of fodder beets for ethanol production, 179
Soy lees, production of cellulase form, 77
Specific growth rate, of human monocytic leukemia cell line, 145
Starch, ethanol production from, 279
———, single cell protein production from, 71
Starch-containing wastewater, anaerobic treatment of, 259
Starchy materials, noncooking alcoholic fermentation from, 175
Steam-exploded poplar, aromatic monomers in, 567
Stepwise control parameter, of fed-batch culture, 317
Stoichiometry, of serine production from methanol and glycine by a methylotroph, 389
Streptococcus equisimilis, hyaluronate lyase production by, 419
Streptococcus lactis, mutualistic dialysis culture with *Candida utilis*, 311
Sugar composition, of mucilage polysaccharides, 51
Sugarcane molasses, fermentative production by *Penicillium citreoviride* from, 493
Sulfur, for methanogen in stable form, 383
Sulfur compounds, of *awamori* during aging, 129
Surfactants, effect on alkaloid production by *Claviceps*, 499
Suspension culture, of human cell, 347

T

Tannins, depolymerization by *Saccharomyces rouxii*, 227
Tannin, fractionation of, from wines, 487
Tamariud seed powder, for citric acid fermentation by *Aspergillus niger*, 561
Tetrahymena pyriformis, respiratory inhibition by copper and copper uptake in mitochondria of, 119
Thiobacillus intermedius, H_2S oxidizing bacterium, 161
Torulopsis candida, high brassylic acid producer, 97
Tryptophan promoter, on-off regulation of, 503
Treatment of wastewater, by floc-forming bacterium, 571

U

Uracil, produced from dihydrouracil, 205
———, production from dihydrouracil by *Rhodotorula glutinis*, 199

V

Vitamin B_2-acid, effect on the growth of *Chattonella antiqua*, 169

W

Wastewater strength, effects of, on an anaerobic filter, 545
Wastewater treatment, of evaporator condensates of a kraft pulp mill, 523
———, using a plate-column reactor, 259
Water hyacinth, biogas production from, 45
Wines, phenolics in, 487

X

D-Xylulose reductase, from *Pachysolen tannophilus*, 219

Y

Yeasts, ethanol-using, 379

Z

Zymomonas mobilis, ethanol production by, in immobilized from, 293

Journal of Fermentation Technology
